# TWK

# **Inductive Linear Displacement Transducers**

Model IWE 250

Measuring strokes: 20 mm, 40 mm, 100 mm, 200 mm

**IWE** 11217 GE

07 / 2015

- Contactless, robust sensor system
- Infinite resolution, no hysteresis
- Digital interface SSI
- Resolution 12 Bits / natural binary
- Gauge with spring return up to 100 mm
- Protection class IP 66

# Construction and operating principle

The displacement transducer operates according to the principle of the differential choke, i.e. an inductive half bridge. It consists of two coils which are encapsulated in a stainless steel cylinder. A mu-metal plunger core causes opposing changes of inductance when it is displaced through the centre of the coils. These changes are converted by the integral electronic circuit into a signal proportional to the displacement. A 12 bits A/D converter supplied a proportional digital signal wich can be calibrated before delivery via on integral-controler.

The transducers are completely sealed to ensure positive protection against vibration, shock, humidity, oil and corrosive matter.

Standard measuring strokes: 20 mm, 40 mm, 100 mm, 200 mm

## **Special calibration**

Up on request the measuring stroke can be reduced without affecting neither the resolution nor the case length, e.g. 30 mm measuring stroke (IWE 250/300) will be generated using IWE 250/40.

# **Electrical data**

 Supply voltage range V<sub>s</sub>: 21.5 to 32 VDC (prot'd against reverse polarity)

Output code: Natural binaryData output: SSI-Differential

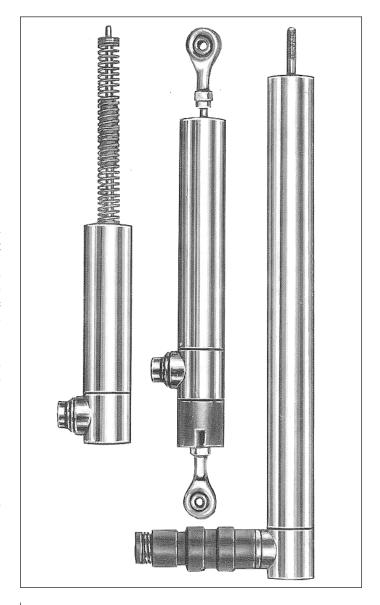

■ Clock input: SSI-Differential to RS 422

■ Monoflops rate:
■ Clock frequency:
■ Interface profile:
■ Linearity:
■ Temperature drift:
■ Stability:
■ Measurement frequency:
10 to 30 µs
SSI 13 Bits
0.5 % or 0.25 %
< 0.01 %/°C</li>
< 0.1 % in 24 hours</li>
100 Hz max.

**Note:** If not otherwise indicated all data are valid at 20° C ambiant temperature, at  $V_S$  = 24 VDC and 30 min. turn-on time.

#### Measuring direction

The measuring signal increases when the plunger moves in direction of the connector. Up to request the reverse action can be calibrated before delivery.

# **Environmental data**

Operating

temperature range: -10° C to +80° C

■ Storage

temperature range: -30° C to +80° C

Resistance to shock: 250 g SRS at 20 at 2000 Hz

Resistance to vibration: 20 g rms (50 g peak)

at 20 to 2000 Hz

■ Protection class: IP 66

#### **Materials**

□ External and internal tube : Chrome-nickel steel □ Plunger : Chrome-nickel steel

□ Core : Mu-metal

□ Connector case : Brass, nickel-plated

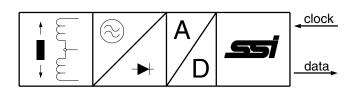

□ Connector contacts : Gold-plated

□ Spring and gauge head : Stainless steel ("T")

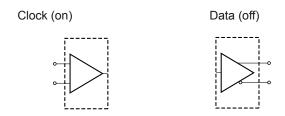

# SSI (Synchron Serielles Interface)

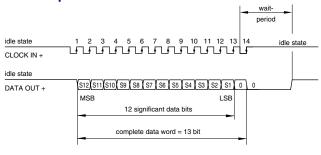

The absolute information derived by the transducer is converted into serial information and the transmitted to a receiving electronic circuit in synchronism with aclock. Important advantages are: Low number of data lines and high reliability.

## Input and output circuits

## Interface profile SSI - 13 Bits

# Lengths and masses ( refer to drawings page 3)

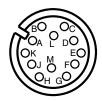

Туре	L1 * mm	L2 mm	without plunger g	plunger only g	
IW 250/20	40	110	210	15	
IW 250/40	50	140	240	19	
IW 250/100	80	250	380	31	
IW 250/200	130	500	720	56	
Ball joint, fror	nt	22 g			
Ball jint rear		55 g			

<sup>\*</sup> L1 = Plunger in central position: 2048 positions.

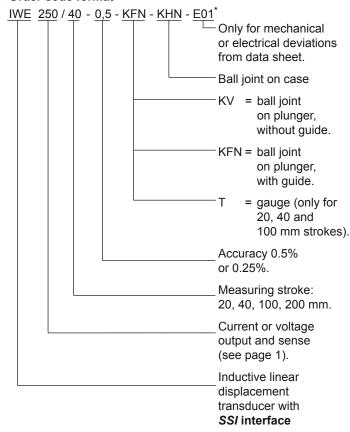

#### **Electrical connections at plug**

(View at connecting face of counter plug)

Pin	Function	PIN	Function	
Α	TAKT IN -	G	n.c.	
В	TAKT IN +	Н	n.c.	
С	DATA OUT +	J	n.c.	
D	DATA OUT -	K	n.c.	
Е	n.c.	L	+ V <sub>S</sub> = 24 VDC	
F	n.c.	М	- V <sub>S</sub> = 0 Volt	

#### **Order code format**

<sup>\*</sup> The applicable A-No. is allocated after the definition of the deviation when ordering. No A-No. is given for standard versions as specified in the data sheet.

Special versions with cable exit will recive "Kx" in addition to above ordering code (X for length of cable).

# Accessories (must be ordered separately)

SR: Stainless tube to protect the plunger against lateral pressure (ref. to data sheet 11537).

Metal mounting block.

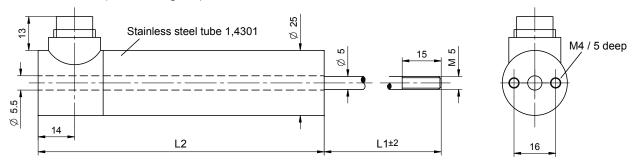

MB 25:

STK12G30: Counter plug with metal housing straight.

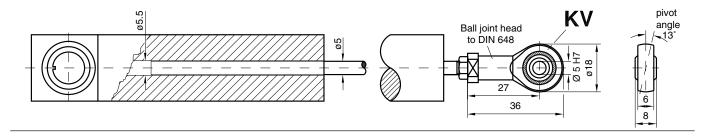

#### **Dimensions in mm**

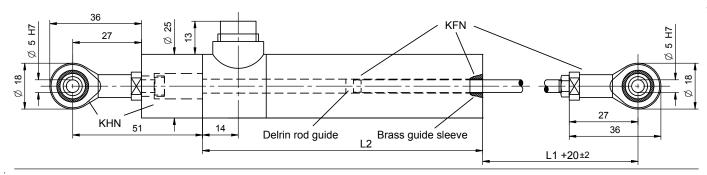

Standard version (without rod guide)

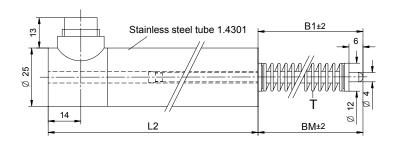

Version with ball joint on plunger (KV) (without rod guide)

# Version with ball joints on plunger (KFN) and on end of case (KFH) (with rod guide, captivated)

# Gauge version (T) with return spring (only up to 100 mm stroke)

Measuring stroke mm	BM mm	B1 mm	FM N	FC N/m
20	70	85	~ 4	0.14
40	70	98	~ 4	0.07
100	140	198	~ 4	0.03

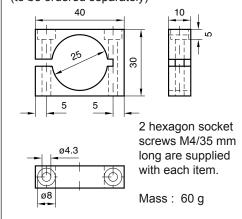

BM = Plunger in central position

B1 = Plunger full out

FM = Spring prestress

Fc = Spring rate

# **MB 25 Mounting block**, brass Nickel plated (to be ordered separately)

# **Mating Plugs**

#### STK12G30:

Counter plug with metal housing straight.
